

Bullzen Batman The Caped Crusader - Limited Edition

"THE CAPED CRUSADER" - The HDCC3 Epic Moment The introduction to the world of HDCC3 is a complete upgrade to the rod, whether we are talking about weight or power. With a special collaboration with Warner Bros, we designed this uniquely designed reed in a limited edition of our first HDCC3 reel. A real jewel of a rod. HDCC3 New Technology HDCC stands for High Density Carbon Composite. It is not solid carbon, as many may think of our HDCC material. It is patented technology invented by BULLZEN. We invented it to achieve surprisingly high maximum resistance to tackle giant monsters with an ultra-thin fishing rod. Over the years, it turned out that this is the third upgrade to the HDCC3. The HDCC3 has improved by 30% in weight reduction, 15% in shock absorbing resistance limit, 20% more sensitivity to the reed tip and a 25% increase in lifting capacity. The Blank of the reed incorporates the 4-axis carbon cross design, which eliminates rotational proliferation of the Blank and enhances overall structural stability, giving these reeds incredible strength and performance on the battlefield. Equipped with a SEA GUIDE base, including SEA GUIDE guides with titanium ring that are optimally positioned for maximum strength, making the "Batman" rods the ultimate rods for slow jigging, light jigging, Tai Rubber techniques.
