## Product Description

The Dark Imperial is a specialized rod designed for shore jigging and boat fishing techniques with an extremely fast action, with a 10 kg pulling power. This rod is made by the high quality Japanese company Torayca, using 30T and 36T carbon types. The composition of 30T and 36T Toray Carbon creates a rod with an excellent balance between flexibility and hardness. The 30T (Dark Imperial) provides the flexibility needed to tackle fish heads, while the 36T (Dark Imperial Hard Attack) adds even more toughness to tackle blackfish rocks as well. Bullzen has built this rod with attention to detail to successfully tackle all pelagic fish. It is a strong and quality rod that will help you successfully tackle the challenges of "shore jigging" and "Boat fishing".

Line Wt. (Lbs)	Lure Weight (G)	Δράση	Μήκος (cm)	Max Drag	Αριθμός Οδηγών	Στελέχη
20 – 40	15 – 50 (πραγματικό 20-60 γραμμάρια)	Extra Fast	274	9	8	2
