

Bullzen Iguana Velocity

Bullzen Iguana Velocity Over the years, the Brutal Monster rod has proven its reliability and high performance in the Southeast Asian region. We've broken countless records catching huge creatures such as Giant Trevally, Sailfish, Barracuda and more. Fighters are starting to use our rods for light jigging in the steep depths of the sea, exploring battles that seem impossible against huge fish. The BRUTAL MONSTER Iguana Velocity rod is built and equipped with top-of-the-line SEA GUIDE R components, including the SEA GUIDE R Reel Seat and SEA GUIDE R K Frame Rainbow Coated SiC Ring, ensuring superior performance during long hours of fishing. The reed blank, based on HDCC Generation-2 technology, has been enhanced by 30% in lifting capacity and 20% in maximum braking power, making it capable of handling almost any kind of fish. We continue to invent the best rods in the world through our proprietary technology. The HDCC2 Rod Blank technology is patented and carries the BULLZEN signature. In addition, the rods are equipped with high quality SEA components, including the SEA GUIDE Guide with titanium ring, which are positioned in such a way as to maximize the integrity of the blank, creating the ultimate efficient rods for dealing with big game. The compressed hard cork handles offer aesthetics and sensitivity, as they have a significantly lower damping capacity that allows them to transmit vibrations better. Plus, they feature a striking BRUTAL MONSTER design on the handle, adding a cool aesthetic touch to your rod.
