Product Description

The NEO Zantetsu CX Brutal Monster Limited Edition is here since its predecessor Zantetsu Bs Monster made us rethink what a full solid one-piece rod is all about. Those who own this rod understand exactly what I mean, from a quality, power, craftsman handling, unrealistic shots that would be the envy of much larger height rods an Epic rod that can really do everything perfectly literally. Now the new Zntetsu CX updated with Bullzen HDCC3 technology and with 8 Fuji K guides with a unique Desing an all around rod from the lightweight "Bs Monster" series designed specifically for LRF, SPINNING, LIGHT JIGGING and light boat vertical techniques. It is a 1.91 cm long one piece Full solid rod, available in four different series, covering a wide range of LRF- HRF - SPINNING fishing the action of the rod is fast suitable for Sargos, Bass, Gobblers Luchos and Tonoids etc. The characteristics of the different grams are as follows:

1. The 1-3LB version with 1.83 height, max drag 10kg 6 grams is suitable for heavier baits, being able to comfortably handle baits with an accuracy of up to 10 grams perfectly.
2. The 2-6LB version with 1.91 height, max drag 12kg 8 grams is suitable for even heavier baits, being able to comfortably handle baits up to 15 grams perfectly.
3. The 3-8LB version with 1.91 height, max drag 12kg 12 grams is suitable for even heavier baits, being able to comfortably handle baits up to 20 grams perfectly.
4. The 4 -10LB version with 1.91 height, max drag 15kg 15 grams is suitable for even heavier baits, being able to comfortably handle baits up to 25 grams perfectly.

This rod can also be used in boat fishing, including the lightweight Light-Micro Jigging and vertical techniques. The impressive strength of 10kg to 15kg at 60 degrees angle of the rod shows that it can cope with even much larger fish of this species. The Zantetsu CX Monster rod has a high quality HDCC3® carbon composite, an innovative and exclusive manufacturing technology from BULLZEN, which has been officially patented. The advantages of HDCC3 include a 500% increase in strength will never break, high lifting power and durability!
