## Product Description

Another quality of the Bullzen company is the spinning mechanism Zantetsu CX. A salt water mechanism with impeccable design and quality as Bullzen has become accustomed to. The grip from 2000 size to 5000 is carbon grip in a marble type design bringing out a firm and strong feel of the mechanism. The mechanism is really smooth, tested for a long time we noticed that the mechanism is like new. Smooth rolling and precise response to its carbon brakes. Features: Speed:5.2:1
