

# Bullzen Zantetsu Elite

1. The Zantetsu Elite XUL covers a range in artificial lures from just 1 to 15 grams. This makes it ideal for the LIGHT ROCK FISHING technique in various conditions and especially for using silicone lead-headed small minnows and jigs and squid the action of the reed is MEDIUM which makes it suitable for the Eging technique.
2. **Sensitivity:** The sensitivity of this reed is excellent. You can feel even the slightest pinpricks and understand the structure of the seabed. This is very important for success in light rock fishing technique, as the sensitivity allows you to react quickly to strike movements.
3. **Carbon material from the leading Japanese company Toray 24T:** The use of material from the Japanese company Toray offers high quality and reliability. 24T Carbon Material is known for its elasticity and bend resistance, a highly parabolic rod of only 80 grams.
4. **X-Cross Carbon Taper Technology:** this technology improves the response of the reed when fishing. This is important when using thin sections and you need to react quickly when the fish attack.
5. **Equipped with Alconite Guides with Stainless Steel Frame (SS Frame Alconite Ring Guide):** The guides of this series are equipped with durable Alconite guides with stainless steel (SS) frame. Alconite guides are known for their exceptional strength and toughness, making the reed performance up to 50% more durable and 35% lighter than regular reeds.

It is indeed interesting to see how much attention to detail and quality Bullzen pays to the Zantetsu Elite rod. This rod is a specialized tool for anglers seeking the ultimate experience of ultralight finesse fishing technique. The Hookit team wishes you good fishing trips!
